English Diploma Programs in Art and Educational Studies for Arts Education Teachers

Statement of Purpose: Educational institutions play an important role in training teachers to meet the mission of preparing students to succeed in today's world. They also support the professional growth of educational leaders in national and international schools.

The Arts in Education Program recognizes the importance of arts learning both within schools (in non-arts and arts classrooms) and in the community, beyond school walls, in art centers and museums. With the growing educational interest in generic skills and the expanding role of art in education, it has become important than ever to train art teachers to assume the role of classroom teachers.

Although there are a large number of national and international language schools in the Middle East there is no English language Diploma in Art Education in the Arab world that addresses the needs of art teachers and classroom teachers who possess different educational backgrounds and whose artistic or English language skills need strengthening. The Faculty of Art Education of Helwan University proposes to provide a Diploma program for teachers to become and remain proficient in the evolving trends of educational leadership in kindergarten, primary and secondary education in public and local language and international schools. The proposed program will emphasize the use of contemporary technology in the qualification of the substantive art and classroom teacher's education. It will also address the issue raised by the increasing importance of foreign language proficiency in educational leadership and classroom instruction that create employment opportunities for teachers within and outside the school

شروط القيد:

- الحصول على درجة البكالوريوس في الفنون أو التربية الفنية أو درجة معادلة لها .
